The original categories began as part of the toy line for The Last Knight in 2017, the smallest of several Turbo Changer price points that are easy to convert, and prominent characters taken from the entire live-action series. Tiny Turbo Changers will then outside the line of toys that gave birth to them, continuing in 2018 under the more general Movie Edition label, co-branded as Generations. While the kind of inspired film finally ended after five series, the series was later re-launched under the Cyberverse franchise. Longtime Takara designer Kōjin Ōno contributed to this line, which was Hasbro's first venture in converting blind bag vinyl, with previous efforts such as Tiny Titans simply static statues. It reportedly took nearly a year to develop the concept to their satisfaction, with special focus given to combining a variety of transformation programs. The vinyl construction of the figures also allows these transformations to work in impossible ways with the hard ABS resin of larger Transformers toys.
